

minor

hazard

previous

efficient

priorities

instantly

extinguish

drench

If something is not important it is minor.

Something that could be dangerous is a hazard.

If something happened before something else then it is a previous event.

If someone gets things done quickly, correctly, and without trouble that person is efficient.

If some things are more important than any other things they are priorities.

If something takes almost no time to happen it happens instantly.

When you completely put out something like a fire you extinguish it.

When you completely soak something you drench it.
